- I found this class to be very boring, the content felt sort of like a high school class.
- The content was conceptually challenging, but taught extremely well. When something was challenging, I would still end up with a deep understanding of it.
- Never any content that couldn't be understood without some work, but it was a more rigorous course in terms of content but the assignments were built around helping us understand concepts so it was super fun!
- I think that Dr. Aha does a good job of breaking down the material in a way that is intellectually stimulating but not too difficult that it is frustrating.

- I dont think expectations were clear regarding grading for papers.
- Only thing is an exam review sheet would have been helpful
- Every assignment was expected and easy to find on Moodle and the syllabus.
- Dr. Aha does a very good job of reminding students of expectations and deadlines.

5 - The instructor effectively presented information, concepts and ideas of the field.

- Dr. Aha is clearly knowledgeable in the field, but presents the information in such a mundane way it is impossible to pay attention. Slideshows every single class does not engage students.
- Dr. Aha is an excellent teacher, her slides are made very well and I always understood in her class.
- Best professor at explaining more complex concepts, like ever.
- Dr. Aha effectively breaks down concepts in a way that is easy to understand without compromising the course material.
- I think the phrasing of explanations on slides was unnecessarily complicated and took time to understand/breakdown. On days I missed class, it was difficult to understand what was discussed without consulting a classmate
- One of the best professors I have had at Southwestern, class became boring at times because of the lecture style but was a good class.

6 - The class was well organized.

<div>• All of the information in this class was stuff I could look up on Google. I was hoping to learn about how the EU interacted with other nations and how governed international unions are the next step in global politics, but we learned only about the major structures within the EU but that's not intellectually rigorous, that's information I could look up online. The instructor was very nice and graded fairly but I feel like I learned nothing in this class.</div>

Response

In my three years at southwestern this is the class I had the best discussions in. I always felt open to discussing or asking questions.

Instructor was Available Outside of Class Comments

Response

Always responded quickly to any questions.

Overall Instructor and Class Comments**Response**

Loved every minute and was excited to show up to class.

One or more things about course student found valuable**Response**

I have a better understanding of what the world of Political Science is along with the area of Central Europe. Also, I gained a lot of insight of how the post-communist world is and how that effects today's politics.

I found our ability to be flexible and talk about current events extremely valuable in this course as it provided me with better understanding to the current situations we face today.

What suggestions do you have for improvements**Response**

None. No complaints.
